

Workshop on Coastal Climate and Earth Observation Services for Small Island States

An initiative of the ERA4CS funded INNOVA project, co-funded from the European Commission.

The workshop is planned for 13-15 November 2019 in Guadeloupe and Martinique

Objectives

- Have the climate services developers focusing on the unique challenges faced by the small islands.
- Co-identify the gaps and needs for coastal climate services for small island states.
- Co-develop strategies in response to the needs of coastal climate services for adaptation of small island communities.
- Co-establish a platform or networks for the development and sharing of coastal climate services for small island states.

Expected outcomes

- To have a collective voice of small islands on coastal climate services to present at the UNFCCC COP25 in Chile in 2019.
- To exchange between climate services providers and small islands to start the collaboration for addressing the gaps and needs for the future climate services development.
- To layout the roadmap for the coastal climate services for adaptation of small island communities.

Interests

- For participating or co-organising, please contact **Dr. Louis Celliers:** louis.celliers@hzg.de
